

My name is Shenshuai Chen, I'm a student of Shanghai University in China and my major is Electronic Science and Technology. I worked in Institute Mihajlo Pupin from July to August, 2017. These two months were really unforgettable, and I will never forget my experience in Belgrade.

I worked in Telecommunications department. On my first day, Goran Dimić asked me what am I interested in, and I said to him that I was interested in the Labview software environment and that I wanted to get into knowing to use Labview. Then, I have worked with my mentor Natalija Lukić, who helped me a lot, thus now I can skillfully use Labview. It was really a pleasant internship, I have met a lot of nice people there, and I have also made a lot of friends. In my leisure time, I attended a lot of activities, like International Evening, trip around Serbia, Beer Festival and so on. And after work, we always used to go to Kalemegdan and Ada lake to watch the sunset and chat.

The food in Pupin was really good! I have eaten a lot every day, sometimes I was taking a photo and sending it to my friends. They all liked the food and would like to try it by themselves. (~ ▽ ~)~

Love you, IMP,

I will miss all of you! And I hope that we can meet each other somewhere in the future!

Best regards,

Shenshuai Chen
